(54) PORTABLE TELEPHONE SET

(57)Abstract:

PROBLEM TO BE SOLVED: To rationalize a space for the main body of a telephone set by forming a conventionally provided antenna housing part into cylindrical body and utilizing such a cylindrical body as a turning shaft for a lid body.

SOLUTION: In the portable telephone set provided with a main body 1 of the telephone set equipped with a first liquid crystal display part 2 on its surface and a turning board 4 provided to be expanded almost at 180° from the state of being folded to be overlapped on the front face or on the back of the main body 1 of the telephone set through a hinge part 3 provided at one edge of the main body 1 of the telephone set, a second liquid crystal display part 5 is provided on the front face or the rear side face of such a turning board 4. A pivot 3a of the hinge part 3 of the turning board 4 is formed cylindrical and the inner hole of such a cylindrical pivot 3a is formed as a housing part for an antenna 6.
